

Faraday's Researches

	PAGE
VII. § 9. ON THE SOURCE OF POWER IN THE VOLTAIC PILE	232-
Tf i. Exciting Electrolytes being Good Conductors	23§
1f ii. Inactive Conducting Circles containing an Electrolyte	241
Tfiii. Active Circles containing Sulphuret of Potassium	259
VIII. § 9. ON THE SOURCE OF POWER IN THE VOLTAIC PILE—Continued	271
Tf iv. The Exciting Chemical Force affected by Temperature	271
^J v. The Exciting Chemical Force affected by Dilution.	284
«[vi. Differences in the Order of the Metallic Elements of Voltaic Circles	295
*([vii. Active Voltaic Circles and Batteries without Metallic Contact	298
K viii. Considerations of the Sufficiency of Chemical Action	302
If ix. Thermo-electric Evidence	308
T[x. Improbable Nature of the Assumed Contact Force.....	312
ON A PECULIAR VOLTAIC CONDITION OF IRON (SCHOENBEIN)	317
ON A PECULIAR VOLTAIC CONDITION OF IRON (FARADAY)	321, 330
INDEX	333
